Summary

Junior Full-Stack Developer (MERN) with hands-on experience building responsive, maintainable web applications using React, Node.js, Express and MongoDB. Built and deployed projects on Vercel/Heroku, integrated REST APIs and third-party services (Firebase, Cloudinary). Quick learner, team player and committed to writing clean, testable code.

Education

Bachelor's Degree in Computer Science and Artificial Intelligence (Expected Jun 2027)   Oct 2023 – Jun 2027

South Valley National University – Faculty of Computer Science and Artificial Intelligence   Qena, Egypt

Professional Experience

Backend Intern   Jul 2025 – Aug 2025

Web masters ⧉   Cairo, Egypt (Remote)

Built a Blog Application (full-stack) with authentication, CRUD operations, and responsive UI.

Developed a Chat Application using Firebase for real-time messaging and Cloudinary for image storage.

Created a URL Shortener System that generates and manages shareable short links.

Gained practical backend development skills and exposure to full-stack workflows during the internship.

Projects

Chat Application ⧉   Jul 2025 – Aug 2025

Full Stack (React, Firebase)

- Developed a real-time chat platform using React for the frontend and Firebase for backend services.
- Implemented user authentication & authorization with Firebase Authentication.
- Used Cloud Firestore for storing and syncing chat messages in real time.
- Added user presence tracking and message timestamps to improve user experience.
- Integrated image upload & storage using Cloudinary.
- Built a responsive UI with React and modern styling techniques.
- Deployed the project with version control and testing on GitHub.

Blog Application ⧉   Jul 2025 – Jul 2025

Full Stack (React, Node.js, Express, MongoDB)

- Developed a full-stack blogging platform allowing users to create, edit, and delete posts.
- Implemented user authentication & authorization (JWT).
- Integrated image upload & storage using Cloudinary.
- Built a responsive UI using React with CSS Modules.

- Built RESTful APIs with Node.js/Express and MongoDB for data management.

- Deployed the project for testing and version control on GitHub.

Dashboard System (Backend) ⧉   Jul 2025 – Jul 2025
Backend (*Node.js, Express, MongoDB*)
- Developed a backend dashboard system using Node.js and Express for managing users and records.

- Designed and implemented a RESTful API structure to handle CRUD operations.

- Integrated MongoDB for efficient data storage and retrieval.

- Applied data validation and error handling for secure and reliable endpoints.

- Documented the API endpoints for easy testing and integration.

- Deployed the backend on GitHub for version control and collaboration.

Skills

Frontend: HTML5, CSS3, JavaScript, Typescript, React.js, Redux Toolkit, Tailwind CSS, Bootstrap, Jquery, Next.js

Backend: Node.js, Express.js, MongoDB, Firebase, REST APIs, JWT, Cloudinary

Tools & Workflow: Git & GitHub, npm, Webpack/Vite, ESLint, Prettier, Postman

Other Skills: C++,Object-Oriented Programming (OOP), Data Structures & Algorithms, Problem Solving
